

# Expert and Stakeholder Workshop: Holistic Monitoring of Offshore Wind Farms

Holi-Doctor Project: Holistic framework for DiagnOstiC and monitoring of wind turbine blades, funded by NWO.

**Date:** 22 May 2024

**Venue:** Wageningen University, The Netherlands

**Join the unique meeting of experts and practitioners in different fields of offshore wind!**

This expert workshop brings together key stakeholders, industry experts, researchers, and policymakers to deliberate on the current and future needs, concerns, and practices related to offshore wind turbine monitoring and management.

The workshop will focus on developing a holistic approach that encompasses social, ecological, and technical aspects of offshore wind farms. A central theme of the workshop is the design of a tool for holistic wind turbine blade monitoring and the development of new maintenance regimes for offshore wind farms.

By bringing together diverse expertise, this workshop aims to foster collaboration and innovation in the field of offshore wind turbine (blade) maintenance and monitoring, ultimately contributing to the advancement of sustainable and holistic practices in the industry

Save the date and stay tuned for further details! #HoliDoctorWorkshop  

## Agenda:

12:00 Welcome Lunch and coffee

13:00 Opening by Prof. Dr. Simon Watson, Delft University and project partners

14:00 Session 1: How to monitor offshore wind farms holistically?

15:00 Session 2: How should new maintenance and management strategies look like?

16:00 Closing session: Summary of Key Insights from the Day & Next Steps

17:00 Network Drinks
